2009 Tree & Shrub Care Programs

Standard Tree and Shrub Care Program

Standard Round 1

Early spring before budding season, which may be any time after the last frost through the budding season, usually from March 15th to April 15th

Dormant Oil Treatment helps to control over wintering eggs, immature and some adult insects.

Standard Round 2

Early growth or budding season after ornamentals begin to "bud out" (or come out of winter dormancy) usually from April 15th to May 15th

Insect Control targets leaf feeding insects such as Tent Caterpillars, Leaf Miners, and Sawfly Larvae

Disease Control targets diseases, fungi, and mildews at early stages, such as scab, rust and powdery mildew

Standard Round 3

Mid-season growing period or flowering season, usually from May 15th to June 15th

Insect Control targets leaf beetle larvae, aphids, Japanese Beetles as well as other sucking and chewing insects

Disease Control targets leaf spotting diseases such as scab and rust to minimize their effects

Standard Round 4

Mid-season growing period or flowering season, usually from June 15th to July 15th

Insect Control targets leaf beetle larvae, aphids, Japanese Beetles as well as other sucking and chewing insects

Disease Control targets leaf spotting diseases such as scab and rust to minimize their effects

Standard Round 5

Mature foliage season, usually from July 15th to August 15th

Insect Control targets Spider Mites and foliage-eating insects such as webworms and aphids

Disease Control targets leaf spotting diseases such as scab and rust to minimize their effect

Standard Round 6

Mature foliage season, usually from August 15th to September 15th

Insect Control targets Spider Mites and foliage-eating insects such as webworms and aphids

Disease Control targets leaf spotting diseases such as scab and rust to minimize their effect

Standard Round 7

Fall, usually after October 15th

Deep Root Fertilizer Injection (root zone injection) improves fruit and bud production, as well as root structure

Please see reverse for our Advanced Program & More

Advanced Tree and Shrub Care Program

Our Advanced program includes:

- Standard Program Rounds 1 through 7
- Additional Spring Deep Root Feeding Treatment
- Additional Fall Dormant Oil Treatment

Integrated Pest Management *or* "I.P.M."

"Integrated Pest Management" simply means particular ornamentals are treated for specific diseases or insects during the appropriate time of the season, rather than the broad-spectrum preventative approach taken by our Standard and Advanced Programs.

I.P.M. treatments start at a minimum charge of \$65.00 per visit, per ornamental. This targeted approach can be more costly, but is also a more environmentally friendly approach to your treatment needs. The replacement of a spray treatment with a systemic treatment is only available for *disease or insect control applications*.

Exact pricing for I.P.M programs are on an individual property basis, and free estimates are available upon request.

Additional Services

Systemic Injections (Trunk Injections)

We offer these injections for specific ornamental problems such as mineral deficiencies or bore infestations. Any insecticide or disease control sprays can also be substituted for systemic injections. Prices vary depending on tree or shrub size, as well as injection type. Our systemic injections are performed by specifically licensed applicators.

Seasonal Pruning and Trimming

To help keep up the health and vigor of your ornamental trees and shrubs, take advantage of our trimming and pruning services. Our professionally trained staff can trim and prune to your liking, as well as specific pruning for each variety of tree and shrub on your property.

Free Diagnostic Care

Both our Standard and Advanced programs offer free diagnosis of any problems at each visit or scheduled appointment. Call us at (734) 416-9062, e-mail us at info@serenesurroundings.com, or visit our Customer Assistance page via our website, www.SereneSurroundings.com, to schedule service calls.

Serene Surroundings, Inc. can also provide you with replacement or additional plants through our Landscaping Department.

Discounts and Incentives

If you choose to prepay for either our Standard or Advanced Tree and Shrub Programs, you will receive a 10% discount off of the total price of your program.

If two ornamental tree and shrub trimmings / prunings are scheduled for this season at the time of your program prepayment, you will receive one of your Insect & Disease Control Treatments for FREE.

We appreciate your business!
